PROFESSIONAL SUMMARY

B.Tech Computer Science Engineering graduate with hands-on experience developing full-stack web applications and backend systems using Python, FastAPI, React.js, JavaScript, SQL, and PostgreSQL. Experienced in building RESTful APIs, CRUD applications, authentication and authorization features, and database-driven solutions. Strong foundation in problem-solving, API integration, and application development. Familiar with Git, GitHub, Docker, and Linux.

TECHNICAL SKILLS

Programming : Python, JavaScript
Web Technologies: HTML, CSS
Frontend Development: React.js, Bootstrap
Backend Development: FastAPI, REST APIs, Uvicorn
Databases : SQL, PostgreSQL
Development Tools : Git, GitHub, Docker, VS Code
Operating Systems : Windows, Linux (Basics)
Core Concepts: CRUD Operations, Authentication and Authorization,RESTful Services, API Integration,

PROJECTS

Full-Stack Blog Platform — React.js, FastAPI, PostgreSQL.

- Built a full-stack web application using React.js and FastAPI.
- Developed REST APIs and CRUD functionality with PostgreSQL.
- Implemented authentication and authorization for secure access. (Try it here)

Finance Backend System — Python, FastAPI, REST APIs.

- Developed RESTful APIs for financial data management and CRUD operations.
- Implemented Role-Based Access Control (RBAC) for secure authorization.
- Built dashboard APIs for data aggregation and reporting. (Try it here)

TODAY I LEARNED – FACTS APPLICATION — React.js, Supabase

- Built a React.js CRUD application for creating and voting on facts.
- Implemented state management for dynamic UI updates.
- Integrated Supabase for real-time data synchronization. (Try it here)

EFFICIENT ORDER MANAGEMENT SYSTEM — Python.

- Developing a Python-based solution to optimize order fulfillment.
- Implementing MOQ and 20FT/40HQ container business logic.

EDUCATION

B.Tech in Computer Science Engineering, Bheema Institute of Technology and Science
Completed - 2026
CGPA - 7.2
