PROFESSIONAL SUMMARY

Detail-oriented Full-Stack Web Developer with expertise in building responsive, data-driven web applications. Proficient in modern JavaScript frameworks (React.js) and Python-based back-ends (FastAPI). Strong foundation in database management with PostgreSQL and real-time data integration via Supabase. Committed to writing clean, maintainable code and optimizing user experiences across all devices.

TECHNICAL SKILLS

- **Languages: HTML, CSS, JavaScript, Python**
- **Front-End: React.js, Bootstrap**
- **Back-End Basics: Fast API**
- **Databases: SQL, PostgreSQL**
- **Tools: Git, GitHub, VS Code, Docker**
- **Operating Systems: Windows, Linux (Basics)**

PROJECTS

Full-Stack Blog Platform

• Architected a full-stack application utilizing FastAPI for the backend and React.js for the frontend interface.

• Designed and implemented a relational database schema using PostgreSQL to manage user data and posts.

• Engineered secure Authentication and Authorization protocols to protect user data and restrict content access.

• Streamlined data flow between the server and client to handle seamless CRUD operations.

Today I learned - Facts Application

• Built a React-based CRUD application enabling users to post and vote on facts in real time.

• Implemented efficient state management for dynamic UI updates.

• Integrated Supabase real-time backend for live data synchronization.
