PROFESSIONAL SUMMARY

Detail-oriented Full-Stack Web Developer with expertise in building responsive, data-driven web applications. Proficient in modern JavaScript frameworks (React.js) and Python-based back-ends (FastAPI). Strong foundation in database management with PostgreSQL and real-time data integration via Supabase. Committed to writing clean, maintainable code and optimizing user experiences across all devices.

TECHNICAL SKILLS

- **Languages:** HTML, CSS, JavaScript, Python
- **Front-End:** React.js, Bootstrap
- **Back-End Basics:** Fast API
- **Databases:** SQL, PostgreSQL
- **Tools:** Git, GitHub, VS Code, Docker
- **Operating Systems:** Windows, Linux (Basics)

PROJECTS

Responsive Professional Portfolio

- Developed a high-performance personal website using semantic HTML5 and advanced CSS3 techniques.
- Implemented Mobile-First Design principles to ensure 100percentage responsiveness across desktops, tablets, and smartphones.
- Optimized asset loading and accessibility to improve site performance and user navigation.

Today I learned - Facts Application

- Built a React-based CRUD application enabling users to post and vote on facts in real time.
- Implemented efficient state management for dynamic UI updates.
- Integrated Supabase real-time backend for live data synchronization.

[\[Try it here\]](#)

Full-Stack Blog Platform

- Architected a full-stack application utilizing FastAPI for the backend and React.js for the frontend interface.
- Designed and implemented a relational database schema using PostgreSQL to manage user data and posts.
- Engineered secure Authentication and Authorization protocols to protect user data and restrict content access.

Efficient Order Management System (Python) — Ongoing

- Engineered a Python automation tool for a snack exporter to optimize global order fulfillment.
- Implemented math logic for MOQ and container constraints (20FT/40HQ) to reach 98%
- Designed system to target a 15

Finance Backend System

- Developed a scalable backend system using Python, FastAPI, and Uvicorn.
- Implemented Role-Based Access Control (RBAC) for secure user authentication and authorization.
- Designed and developed RESTful APIs for financial data management (CRUD operations).
- Built dashboard APIs for data aggregation, reporting, and analytics.
